

I enjoyed talking to you about our professional Security Cameras installation services. This email is the one we discussed, which has info about our services as well as the Specials that include a Security Cameras system, and photos of what they look like. If you have any questions, feel free to reply to the email or give us a call.

We talked about the Pro Special which is only \$1200 for an 8 Channel, 4 Camera system with professional installation. 8 channels means your system is capable of adding up to 8 cameras. You will receive 4 now, with professional installation, and will be able to add up to 4 additional cameras in the future, without having to purchase a new DVR. The Pro system has higher resolution cameras (900TVL vs. 540TVL) with stronger nightvision (100ft vs. 50ft) plus the hard drive in the DVR, that holds the recordings, is twice the size (1TB vs. 500GB)! All of these figures are in relation to our prior special, which was still a very nice system. It also gives you the HD app which has enhanced functions for Remote Viewing your cameras from mobile devices. Most systems only allow you to view live footage. Our does that too but with the Pro system, you can also view recordings from the DVR, right from your phone or tablet and you even have the ability to take snapshots and record video directly to your mobile device! This is the only system I've seen with such an advanced app for Remote Viewing. The Pro System is really the top of the top but it still has a beautiful price point! You can see what it looks like in the photos that start with ProSystem.

It is a 960H Resolution system (this is the important number that tells you the quality of picture you will see). This is the highest resolution and it is DVD quality. The hard drive is 1TB in size, which will allow at least 1 month of recordings. During install, we will connect the DVR to a monitor or TV so you can switch the input and view your cameras right on the big screen, in HD! We also setup Remote View so you can view your cameras from any smartphone, tablet or computer, with no monthly fee. They say it's impossible to be in 2 places at once but that's no longer the case; Now you can view your home or business from anywhere!

With our Pro Special, which is \$1200 for an 8 Channel, 4 Camera system, add-on cameras are \$225. So 5 cameras would be \$1425 and an 8 camera package, with our Pro Special, would end up being \$2100. With payment by Cash or Check, there will be no extra taxes or fees of any kind. When we say \$1200, that means \$1,200.00 PERIOD. Everything with us is simple, flat rate pricing that includes equipment, labor and any extra parts or materials that may be needed to complete the job. Our niche in the market is to serve those who want the highest quality equipment and installation, for a fair price so if that's what you're going for, we're the company for you!

We can also offer you our previous Special Package Deal as we have a couple of those systems still in stock. It is \$950 for a 4 channel, 4 camera system with professional installation. So you get 4 cameras, just like with the Pro Special however it is only a 4 channel DVR so 4 cameras is the maximum amount you can have without having to get an additional DVR (or we can also upgrade you to an 8 or 16 channel DVR in the future, if you ever choose to add beyond 4

cameras). It is 960H resolution, which is the highest, just like the Pro Special, however the cameras do not have quite as good resolution or night vision capabilities (although they are still very good...the Pro is just TOP of the line). The copy at the top of this email, that discusses the Pro Special, directly compares the specs of the Pro System to this system. This system is still a very nice system and if you are looking to keep your costs low, it is a great option. The photos that start with SecurityCamerasSpecial show this system. There is one that shows what the cameras look like, one that shows the DVR and the quality of the picture, with the DVR connected to a flat screen TV, and the final example photo shows what it looks like when you Remote View the cameras from your smartphone.

\*\*In the example photos, you will see what our installations look like, both on the DVR and camera side. Most of these photos show examples of the exact system we discussed. The Pro system has high end white cameras so when you see those in the photos, that is the system you will be getting. The images starting with ProSystem show close ups of the cameras and DVR that is included in the Pro Special. Also, there are some PhoneView photos that are screenshots of a smartphone, showing what it looks like when you Remote View your cameras from your phone. This is high-end equipment that produces excellent picture quality.

***Here is some information about our company and our services:***

We provide a professional install, with no wires showing which aids in security, aesthetics and reliability -- the wires cannot be seen by onlookers, corroded by weather or compromised by critters or criminals. Additionally, all of the equipment we use is from American companies and comes with at least a 1 year warranty. This has a multitude of benefits including equipment that is quality controlled and software (on the DVR and Remote View app) that is well-maintained and user-friendly. Plus you are supporting a company that employs Americans and by doing so, get access to a U.S. based technical support team.

Another feature that is probably important to you, Remote View, is one of the great things about going with us. Remote View allows you to view your cameras from any smartphone, tablet or computer and is one of the most attractive and revolutionary features about modern Security Cameras. Because of our IT & Computer Networking skills, we set up Remote Viewing on every install, with no monthly fee.

On every project, we send 2 people – an installer, who is an expert at running wires and installing cameras, and an IT professional who is an expert at setting up the DVR and configuring the Remote View. This division of labor is one of the things that makes us special. You are not just getting a ‘man in a van’ who is here today but may be gone tomorrow; you are getting a team of professionals that are working towards a common goal – to give you the best Security Cameras installation possible!

Included in our installation charge is:

- Running all wires in a smart way so that no wires are visible, exposed to elements or in any place they shouldn't be
- Mounting, positioning, tuning of cameras
- Install DVR and optimize settings including motion detection recording
- Wire management near DVR, to keep the wires clean and tidy
- Extra wire/connectors for runs that are longer than the included cables & other parts needed to complete the install
- Configure your router & DVR for Remote View
- Setup Remote View app on all your computers, smartphones and tablets so that all you have to do is run the app and you're viewing your cameras from anywhere!
- Give you a hands-on tutorial on how to use the app and send a Remote View Info email afterwards, which has all of the details about your system and step-by-step directions on how to setup Remote View on a new smartphone, tablet or computer as well as instructions on how to use the advanced features that the app offers.
- Future support. If you have any questions or issues in the future, call us first! The equipment manufacturer has a 24/7 technical support line, that you have access to, but by calling us, you avoid the hold time and get right to an expert that knows your installation and can help you with anything you may need!
- The GetMeTech guarantee -- we stand behind every installation; if you have any type of problem related to the installation we performed or the equipment we provided, we will fix it.

Our clients love us because of our passion for what we do. I'm sure there are other good camera companies out there but I know that the installation we're going to do, is of the highest quality possible and it is a tremendous system you will be getting. The value is unbeatable. Give us a call so we can schedule the install. You can reach me directly at 817-846-7845. Talk to you soon.

Thanks
